SHARON MOLLER
CHIEF DEPUTY ASSESSOR

May 15, 2014

TO: William T Fujioka
Chief Executive Officer

FROM: SHARON MOLLER

SUBJECT: **2014 ASSESSMENT ROLL FORECAST**

Attached is the 2014 Assessment Roll Forecast. For the fourth consecutive year, the Office of the Assessor is anticipating an increase in the Assessment Roll. We project that the 2014 Assessment Roll will increase by approximately 5.05 percent.

The estimate is based on the best information available at this time; however, there are several areas that are subject to change as new trends emerge. These include the extent of growth in business equipment, personal property and fixtures, new construction, and special property use types.

If you have any questions or need additional information, please call me at (213) 974-3101.

2014 Assessment Roll Forecast May 15, 2014

The Office of the Assessor is tasked with determining the fair market value of all taxable property in the county as of January 1st of each year. The 2014 Assessment Roll Forecast is an estimate of the Los Angeles County assessment roll as of January 1, 2014 and the corresponding changes from the prior year. In compliance with Section 27421 of the California Government Code, this Assessment Roll Forecast is the estimation of the 2014 Assessment Roll prior to its completion on July 1, 2014.

Forecast Increase in the Assessment Roll

In 2013 the real estate market in Los Angeles County continued a strong recovery from the 2007-2008 recession. As a result of the recession and real estate market decline, Los Angeles County experienced decreasing assessment rolls from 2007 through 2010. The 2011, 2012, and 2013 assessment rolls reflected modest to substantial increases of between 1.36% and 4.66%.

Based on a variety of indicators, the Office of the Assessor estimates that the 2014 Assessment Roll will increase between 4.5% and 5.8%. This estimate is based on the best information available at this time; however, there are several areas that are subject to change as new trends emerge.

Real Estate Market Recovery

The largest single variable responsible for the increase in the assessment roll forecast is transfers. This category is forecast to increase the assessment roll by approximately 2.43%. This is a direct result of continued strength in the Los Angeles County real estate market. Decline-in-value restorations, new construction, and the annual inflation-adjusted trend (Consumer Price Index) are additional contributors to the forecast increase at 1.77%, .38%, and .38% respectively. The Office of the Assessor is currently projecting the following changes in the 2014 Assessment Roll:

- Changes of Ownership (Transfers) estimated to add \$28.8 billion
- Decline-in-Value reviews estimated to add \$20.9 billion
- New Construction is estimated to add \$4.5 billion
- Annual inflation-adjusted trend (Consumer Price Index) estimated to add \$4.5 billion

Decline-in-Value Reviews

In 1978, California voters passed a constitutional amendment that allows for a temporary reduction in assessed value when a property suffers a "decline-in-value." Decline-in-value adjustments are temporary value reductions applied to properties when the total assessed value is greater than the current market value as of January 1st. Under state law, the Assessor must enroll either a property's adjusted base year value (Proposition 13 value) or its current market value, whichever is less. Conversely, under state law, as market conditions improve and a property's market value increases, the Assessor must "restore" the assessed value back to the adjusted base year value. The Office of the Assessor has nearly completed its review of approximately 340,000 "decline-in-value" properties. Due to the continued real estate market recovery, this year's decline-in-value review includes significantly more "restorations" of assessed value than reductions.
