¹ Use comparative sales approach if possible. If sales approach is not used, the cost approach using the above factors can be employed. Per section 401.16 of the Revenue and Taxation Code, "...if information reported by a taxpayer does not indicate whether this property was first acquired by the taxpayer new or used, then the assessor may average the published factors."

² The categories and terms "New" and "Used" for the above referenced equipment are based on a BOE study. The accelerated percent good and trend factors for "New" are based on the study's findings that new equipment depreciates faster than used.
